## ALFRED F. CONARD

President of The Conard & Jones Co.

Flower-Lovers Everywhere know "West Grove for its Roses."

**T**WAS in West Grove the Rose Growing Industry had its beginning, and 'tis here, we believe, it has reached its highest standard of perfection. It is a pleasure, therefore, to present to our patrons a portrait of "THE PIONEER" who helped bring these things to pass. It was ALFRED F. CONARD who developed the idea of sending these sturdy "own root" Roses by mail. The people soon got to know this and began ordering them from all parts of the country, so that the business grew rapidly. This was the beginning—in 1869. The standing which the Conard & Jones Co. now enjoy as leading American Rose Growers, needs no comment.

To-day—Mr. Conard—ripe in years of experience, happy in the realization of having helped to beautify so many thousands of homes in all parts of our country, is still the honored President of our company, interested and active in the conduct of its business and helping to maintain that high standard of excellence in every department which more than all else makes C. & J. Roses

"THE BEST ROSES IN AMERICA."

# Rose Growing Our Specialty

SINCE 1869 the entire business career of our President (Alfred F. Conard) and Vice-President (Antoine Wintzer) has been devoted to the Growing of Roses. They were pioneers in this industry and as President and Superintendent respectively of their company, were the first to grow, sell and ship "own root" roses on a large scale. In the intervening years since then millions upon millions of sturdy young rose plants have been sent out from West Grove to all parts of our country, and it is under the direct supervision of Mr. Wintzer and Mr. Conard that most of these Roses have been grown and sold. The consequent experience and ability of these two men were an excellent asset for the present firm which was organized and incorporated in 1897, under the new name of The Conard & Jones Company. Our Treasurer and Secretary, S. Morris Jones and Robert Pyle, are responsible business men representing ample capital and well known in this community. With an extensive block of new greenhouses provided with all the modern improvements for heating, ventilating, etc., and with a skilled corps of young men trained under our methods, our West Grove Floral Nurseries are now established with facilities unexcelled.

**New Roses :** Prominent hybridizers know that we are on the lookout for New Roses and come to us with their novelties. Mr. Wintzer, our Vice-President, has himself developed several, so that we are constantly having new kinds from which we select the best for introduction. Thus, during the past five years we have brought out the following which have taken first place among the standard roses of to-day : The New Crimson Rambler "Philadelphia,"—(see front cover)—"New Century," "Royal Cluster," "May Queen," "Ruby Queen," "Pearl Queen," "Clara Barton," "Sir Thos. Lipton," "Magnafrano" and "Beauty of Rosemawr," (see index, page 46.) We also import each year all the prominent New Roses from European growers, which, together with new American introductions, are quickly added to our list as fast as they appear. These we test, keep the best, discard the rest and thus keep our assortment always up to date and yet a safe one to order from.

**Our Aim :** Rose growing is almost a hobby with us, and our constant aim is to supply the Best. It costs us more to grow this kind, for they require more room, more time, more care, and everything must be done thoroughly. But the experience of a lifetime has shown us "HOW," and we do not skimp.

When next you hear any one asking where they can get good plants, please remember these points about C. & J. Roses. You will not find better anywhere and few so good.

WEST GROVE, PA.,  
January 5th, 1905.

Respectfully,

THE CONARD & JONES COMPANY

## FOUR GRADES OF C. & J. ROSES

**"One-Year Old Roses"** Usually greenhouse grown, but well hardened with strong roots and bushy tops from 6 to 15 inches high, according to variety. They bloom freely the first Summer.

**"Quick-Blooming Roses"** are a special grade larger and finer than one-year old but not so large as two-year old. They are especially prepared to bloom quickly and freely and they do it. Please read more about them, page 27.

**"Two-Year Old Roses"** are the regular large size and should bloom abundantly the first year. If not otherwise stated they are greenhouse grown with specially fibrous roots and well branched tops from 1 foot to 2½ feet high (size depends much upon the variety and habit of growth). Please see page 46. Some kinds can be supplied in field-grown dormant plants.

**"Extra Size 2, 3, and 4-Year Old Roses"** For the most part dormant field-grown plants—the largest sizes sold. See pages 7, 11, 20, 22, 25, 40, 44 and 45.

**Caution** Prices on goods sold at special rates (*i. e.* by the dozen, 100, or in special offers), are already as low as we can afford; hence, on goods bought at these rates no further Premiums can be allowed.

**Free by Mail** Please notice that everything offered in this book, excepting large two-year old roses and other large size plants are sent free by mail on receipt of price. To Canada, we send pot-grown roses, also plants, bulbs and seeds by mail, postpaid; but large size and dormant field-grown roses, shrubs and trees are prohibited except from March 15th to May 15th, and from October 7th to December 7th. We also send to Mexico, Hawaii, Bermuda, Cuba, Porto Rico, in fact we ship all over the world.

## ORDERS BY EXPRESS

Two-year old roses, large size shrubbery, fruit trees, etc., are too large to mail and must be sent by express. We recommend that customers instruct us to ship smaller sized plants also by express, when in our judgment it is best to do so. We can send larger plants this way and can leave most of the earth on roots, which is of course much better for our customers. Express Charges must be paid by the purchaser, unless otherwise agreed. But we are careful to pack as light as safety of the plants will permit and add as many extras as we can afford to help cover charges and since the expression on plants, bulbs, etc., is now 20% less than regular merchandise rates, the cost of sending goods in this way, even to distant points, is quite reasonable.

## The Cost of Express Charges

you can estimate quite closely with the following schedule. Use the rate named for the town nearest you and count the weight of two-year old plants when packed ready to express about as follows: 12 plants=15 lbs.; 25 plants=30 lbs.; 125 plants=100 lbs.; plants one year old 20 to 30 lbs. per 100 plants.

# C. & J. QUICK-BLOOMING ROSES

**W**E want all our friends to try our **Special Grade Quick-Blooming Roses**, as offered in the following list.

They are especially selected early-flowering varieties, grown last season and kept dormant over Winter, and then repotted in larger size pots, which makes stout, stocky plants with an abundance of strong working roots, in best possible condition for vigorous growth and quick bloom. They should be planted as early as possible after the frost is out; rough weather will not hurt them, and the earlier they are planted the quicker and better they will bloom. **There are no roses equal to these for quick and satisfactory bloom.**

They cost a little more than the ordinary size, but are worth twice the difference, and are sent postpaid by mail at the prices stated. They are so **hardy and vigorous** you cannot easily kill them or keep them from blooming.

The York and Lancaster Rose belongs to the Centifolia class, and is noted for its perfect hardiness and delightful fragrance; also for its beautifully variegated flowers, which are large and double and elegantly striped with deep crimson and pure white. ## FOR GENERAL PLANTING

### GENERAL JACQUEMINOT

The Premier Hardy  
Crimson Rose

Famous the world over as one of the most magnificent Hardy Crimson Roses ever introduced.

It is a strong vigorous grower, entirely hardy, an early and abundant bloomer, and both buds and flowers are considered models of perfection, and its brilliant shining crimson color is the standard of beauty by which other roses are judged. In fact, it is almost unequalled in beauty of form and brilliant intensity of color. It is not a new variety, but so valuable that it is frequently scarce and difficult to obtain, as almost every one wants a "General Jack." This year, however, we have secured an unusually large stock offered below, and hope to have enough to supply all demands.

# HARDY Hybrid Perpetual Roses Continued

THE Hybrid Perpetuals are considered the most valuable of all roses, because they bear the largest, sweetest and most brilliant colored flowers, and are so hardy and vigorous they live over Winter without protection, and continue to bloom regularly from year to year. Their grand flowers are of all shades of red, crimson, scarlet, pink and white, but no yellows. They thrive and bloom finely in all sections of the country and should generally be planted in open ground, as but few varieties are suitable for house culture. Some kinds do not bloom till the second year, but when fully established bloom regularly at the usual time, and occasionally during the Summer and Fall months. Though called "Perpetual," they are not constant bloomers but are the finest and most beautiful of all Hardy Roses.

We offer the choicest and most Beautiful Varieties in Cultivation, and send Strong, Healthy Plants from 2½ and 3-inch Pots all on their own roots. Persons who order at the single rate may select to value of 15 cts. additional on every dollar sent.

# Two Year Old Dormant Perpetual Roses

(IMPORTED)

**A**S there is increasing demand for large dormant field-grown roses for Fall and early Spring planting, we offer herewith, in addition to our own growing of C. & J. ROSES, a very choice stock of Imported Hardy Perpetuals. They are large thrifty bushes, 2 to 4 feet high, just the kind you want to make a fine appearance and bloom quickly. They have given splendid satisfaction wherever tried, and we are sure will please you. PRICE, 40 cts. each. Set of 12 varieties for \$3.50, packed to express here.

**NOTICE** These large imported roses are not grown on their own roots, but are budded or grafted and should, therefore, be planted sufficiently deep to place the junction of the root and graft, three to four inches below the surface. When this is done, wild shoots will not often start from the root, and if they do, the growth and foliage are so different from the true variety that it will quickly be seen and should be cut out down to the root at once. The varieties listed herewith are among the very best for this climate, and so entirely hardy they can safely be planted in the Fall, as long as ground continues open, or in the Spring, as soon as frost is out. Rough weather will not hurt them, and the earlier they are planted the better, so they can get a good start made before hot weather. We give purchasers their choice of varieties as far as possible, but if all the kinds asked for cannot be given, request permission to put in other similar sorts of equal value without further instructions, and always guaranteeing full satisfaction in every way. **NOTE**—We never send budded roses unless specially asked for, and when they require it, always cut them back to proper height for planting before shipment, unless otherwise directed. As this stock is limited and we can get no more this season, it is important to order as early as possible. Orders will be filled in strict rotation as long as stock lasts. (See list of leading varieties below and descriptions in index.)

## CANNA LILIES

If our grandmothers could see our Modern Canna Lilies they would throw up their hands in admiration, for instead of the old-fashioned flowerless Canna which they loved on account of its leaves, we now have plants with the same handsome foliage, but with, *also, great masses of large lily-like flowers—gorgeously beautiful.* That is why we call our newer kinds *Canna Lilies* instead of just *Cannas*.

**"KING OF BEDDING PLANTS"** is a title they have, and richly deserve. They begin to bloom by the end of June and never stop till frost. The flowers are a veritable blaze of color in every shade imaginable (except blue) and either plain, dappled, edged, striped or variegated. Plants range in sizes from 2½ to 7 feet high with foliage of green or bronze often striped like some rare tropical plant. So you see they are suitable for planting in beds of all possible shapes and sizes or for placing along fences, walls, porches or driveways, for screens, hedges and border plants. (See our Suggestions, page 135.) They grow most anywhere, but do best in rich soil. We send full cultural directions with every order and also tell you how to keep the roots over Winter. Canna Lilies ordered early should be started indoors. Plant out when the ground is warm (say May 10th in this latitude). Easy to grow and multiply rapidly. Try some.

A BED OF C. & J. CANNA LILIES IN FRONT OF THE AGRICULTURAL BUILDING AT THE WORLD'S FAIR

### We Originate New Canna Lilies.

known as a skilled hybridizer and grower of roses) has originated by scientific "crossing" and "recrossing" of the Canna flowers, more new varieties than we can count. Each year we have made careful selection from these "seedlings" and have introduced to the American people about 60 new and distinctly improved sorts. These C. & J. varieties represent the highest type of up-to-date Canna excellence: the largest and finest flowers—the greatest variety and brilliancy of colors and the kinds best constituted to stand the trying conditions of our American climate. "People who know" recognize this and come to us for stock. *To-day we are looked upon as Headquarters for High Grade Canna Lilies.*

During the past ten years, our Vice-President, Mr. Wintzer (who is well

extensive exhibit of Canna Lilies as did also other prominent firms from this country and Europe. The Exposition authorities did the planting in regular St. Louis soil without extra coddling or care. Our customers and friends returning from the Exposition reported that "The Conard & Jones Co.'s flower beds were the most magnificent display of bright flowering plants on the 1200 acres of ground!" The judges were unanimous in awarding: "**THE GRAND PRIZE** (highest possible award and the only Grand Prize given Cannas) to **THE CONARD & JONES COMPANY, WEST GROVE, PA.**" It is wholly because of the quality of our stock that judges, experts and customers agree that "**C. & J. CANNA LILIES are best in the world.**" You should have some on your lawn.

# NEW and RARE CANNAS for 1905

All Originated and Introduced by THE CONARD & JONES CO.

Varieties marked "1905" are now offered to our customers for the first time. They are yet very rare and cannot be had from any other firm. These are some of the Cannas that created such a sensation at St. Louis last Summer and helped us win the Grand Prize.

**The New Striped Canna, "CHAMELEON" (1905)**—Flowers change color; when first open the blossoms are rich golden orange overlaid with long stippled stripes of Indian red. Later they turn to self yellow and rose pink, while cutely curled in the centre of each is a single petal of solid red. The entire effect is very gay and fascinating and the plant flowers so freely that it is almost as conspicuous as "Gladiator." Foliage is green and luxuriant. Height, 5 feet. Price for nicely started plants, 50 cts. each, postpaid.

**Improved "BLACK BEAUTY" (1905)**—Black Beauty is well known for the magnificent color of its deep rich purple leaves; its flowers are insignificant. The improved variety retains the same beautiful foliage, but grows more luxuriantly and also bears bright red flowers. Attracted more attention at the World's Fair last Summer than almost any other Canna there. Price, nice plants, 35 cts. each, postpaid.

**New Bronze Leaved Canna, "JUANITA" (1905)**—Looks like some rare tropical plant with abundant foliage of dark green strikingly veined and edged with bronze. Bloom spikes are erect and well branched. Flowers unusually graceful, of rich chrome yellow and flesh pink throat; of good habit and very attractive. Height 4 to 5 feet. Price, nicely started plants, 50 cts. each, postpaid.

**New Hybrid Orchid Flowering Canna, "INDIANA" (1905)**—The foliage of this variety forms a solid mass of green 3 to 4 feet high, and above this the flower spikes shoot up to a height of 5 to 6 feet, each one bearing fine big clusters of orchid-like flowers. Color is a glistening golden orange daintily marked and striped with red. Single blossoms are often 7 inches across. Price, Potted Plants, 75 cts. each, postpaid.

## Snowy White Canna MONT BLANC

**MONT BLANC** was introduced by us in 1902 and is to-day by all odds the finest white Canna in commerce; in fact, there is no other variety that can compare with it. It has a vigorous constitution, **blooms early and continuously** in the greatest profusion during the whole growing season. Its foliage is bright glossy green, very large and handsome, and so thick and leathery it is not often injured by rain or wind. It is a strong-growing variety, and will produce from **fifteen to twenty flower stalks in a season**. Its great masses of snowy-white blossoms contrast finely with the splendid crimson and pink varieties, making the most gorgeous and showy flower beds for the lawn or garden it is possible to have. See illustration from photograph. **Strong plants, 50 cts. each; \$2.50 for 6, delivered.**

## 12 PRIZE-WINNING CANNA LILIES

All these kinds attracted much attention at the World's Fair last Summer; indeed, they might be called the "GRAND PRIZE" set, for you have here a complete assortment of large flowering kinds in the finest crimson, pink, yellow and variegated colors, with either bronze foliage or green. For all 'round good qualities they are absolutely unsurpassed unless by the new ones on page 49.

**Fairest Pink Canna, "Betsy Ross"**—(Named after the illustrious maker of the first American flag, our Mrs. S. Morris Jones being a direct descendant). We think this is one of the loveliest, sweetest and most beautiful of all Pink Cannas yet introduced. A compact grower with solid well-filled trusses, flowers always bright and fresh; certainly a beauty. About three feet. (Green Foliage.)

**Buttercup**—True bright buttercup yellow; large beautifully formed flowers in fine large handsome trusses; stands unfavorable weather better than most any other kind and always shows up bright and clear, and is undoubtedly the best and most beautiful pure, bright, deep yellow Canna yet produced. Height, three feet. **Dormant Roots, 20 cts. each.**

**Duke of York**—Largest and most magnificent of the variegated Cannas. Bears great bunches of immense flowers. Color, a beautiful rich deep crimson, with a throat of curious yellow mottled creamy white, and each petal exquisitely edged with an irregular border of fine gold. Light green foliage, very tough; a strong grower. Height, four to five feet.

**Evolution**—The flowers are rich golden yellow, shading through canary and sulphur to a centre of beautiful blush pink. Such exquisite, dainty color, mounted on the handsome dark bronze foliage, produces one of the most rare and pleasing color contrasts of any Canna in existence. Exceedingly unique and sure to attract attention.

**"Brandywine," the beautiful Bronze-leaved Canna**—A healthy vigorous grower of four to five feet. Makes a luxuriant growth of dark bronze foliage and a magnificent display of fine large flowers. Color is intense vinous red beautifully dappled with deep crimson; two or three petals are sometimes narrowly edged with bright gold.

**"Niagara," Crimson and Gold**—We consider "Niagara" the best of the low-growing variegated Cannas. Great handsome trusses; broad, thick, durable petals; color, rich deep crimson with a wide irregular border of deep golden yellow. Height, 3 feet. Green foliage.

**Queen of Holland**—This handsome Canna makes well-balanced plants, two and a half to three feet high. Foliage very dark green, heavily veined and edged with bronze. Bears immense branching trusses of perfectly beautiful flowers. Color, deep rich orange.

**New Coral-Pink Canna, "West Grove"**—Flowers extra large. Color, bright rich coral-pink, delicately overlaid with glistening orange scarlet bloom; petals finely dotted and lined with deep crimson. Makes strong shapely plants four to four and a half feet high; a prodigious bloomer; stands rain and heat with impunity.

**Cherokee**—This Canna is a royal beauty, of pure dark maroon, a shade of coloring so intensely deep and rich that it beggars all description. Petals are two inches broad, soft and fine as velvet. Blossoms borne on big branching trusses. About three and a half feet high. Foliage light green and very good.

**Black Prince**—A magnificent variety, flowers frequently five to six inches across. Color, an intense dark velvety maroon, almost black. A strong erect grower, with fine dark red stems and deep green leaves edged with purple. About five feet.

**New Bronze-Leaved Canna, "Hiawatha"**—Foliage is beautiful bronze, bright striped and variegated with rich green. Flowers are borne in big bunches on strong straight stalks. Individual flowers are large, have broad petals, gracefully rounded and slightly crimped. Color is a delicate tint of rosy pink daintily dappled with silver blush, and finished off with a border of clear cerise. A most charming combination. Height about three feet. Good sound roots, **25 cts. each; 12 for \$2.50, postpaid.**

**NOTE**—Please see suggestions on back cover page.

**"Gladiator," Improved Florence Vaughan**—Visitors walking through our Canna fields stop short in front of "Gladiator" every time. The big, round flowers of bright yellow petals are thickly spotted with pure crimson, smaller centre petals are solid crimson, rich and glowing: blooms profusely. Heads are unusually large and borne on long strong stalks with tough deep-green foliage. "Gladiator" will stand the storms better than any other Canna there is unless it be "Buttercup." Height, four to five feet. (See cut.) Strong Dormant Roots, **25 cts. each; 12 for \$2.50, postpaid.**

**PRICE:** All Cannas on this page (if not otherwise priced) in Fine Dormant Roots until May 1st at **15 cts. each; 6 for 80 cts.; 12 for \$1.50, postpaid; or 25 for \$2.75, by express.** After April 15th Potted Plants at **5 cts. each more than dormant roots.**

# HARDY PERENNIAL PLANTS

## OR OLD-FASHIONED GARDEN FLOWERS

ONE of the chief delights that comes from owning a garden is in having flowers enough to give one's friends, as well as for house and table decoration. The beauty, variety and lasting qualities of Hardy Perennials make them especially useful as cut flowers. They are also equally valuable for adding brightness and color to the border beds, and a comparatively small collection will enable you to have some flowers in bloom all Summer through. They require almost no care at all, are perfectly hardy, and last for years, which makes the first cost almost the only expense. Thus as a class, they combine beauty, utility, and economy in a rare degree.

**PRICES Unless Otherwise Noted :** 15c. each, 2 for 25c. or 12 for \$1.10, postpaid.  
25 for \$2.00 and \$7.50 per 100, by express.

**DIRECTIONS:** We send you most of these in roots. Plant in the early Spring or Fall, allowing from 1½ to 4 square feet of space for each, depending upon the size and character of the plant, unless otherwise noted. They will do well in any soil that will grow garden vegetables; it should be reasonably rich and spaded to a depth of 2 feet, to allow of good root growth. Keep down the weeds and if you find any plants inclined to sprawl, put in a stake for support. After the first severe frost in the Fall, cut down the tops to within 3 inches of the ground, and give the bed a good coat of half rotted manure (this will both protect the plants and enrich the ground); dig this under in the Spring, before new growth starts.

# New Tuberous-Rooted Begonia (BEGONIA SPLENDENS)

NEW TUBEROUS BEGONIA

Our new Tuberous-Rooted Begonias are among the most beautiful of all Summer flowering bulbs. They grow 12 to 15 inches high, branching freely and blooming abundantly all Summer and Fall. The flowers are exceedingly rich and handsome; from four to six inches across; many brilliant colors, including red, pink, crimson, scarlet, salmon, yellow and pure white. **The Bulbs should be started early in the house**, and set out when ground is warm; they like rich, moist ground when convenient, but will do well in all usual places if mulched with old, well-rotted manure or some similar material to shade the ground and prevent it from getting too hot and dry. Keep roots in cellar over Winter and they will produce larger and finer flowers year after year. They are very grand and beautiful and extensively used in the finest places. Can be kept in pots or bedded out as preferred.

**Any ordinary soil will grow beautiful flowers.** Make it fine and mellow, plant at proper time, keep clear of weeds, and Nature "will do the rest."

**Do not plant when ground is wet and soggy,** or it may bake so hard as to prevent the little plants from coming through.

**Transplanting.** Nearly all flowers are improved by transplanting, except Sweet Peas, Poppies, Centaureas, etc., which are usually sown where they are to grow. By starting tender seeds in boxes, hot beds or cold frames and transplanting, you escape danger of frost and secure the earliest and finest flowers.

## Special Offer:

1 doz. each, of the Ten Varieties, \$1.50, postpaid. By express, 75 cts. per 100, \$4.00 per 1000. Not less than 25 of a sort, at 100 rate, or 500 at the 1000 rate.

When Setting Out Strawberry Plants be careful not to let the roots get dry. It is a good plan to dip the roots in water, taking care not to wet the crowns, and then "heel" in moist shady ground until you are ready to plant. Press the earth down firmly on the roots, so as to exclude the air and hot drying winds. This is very important.

## C. & J. VELVET GREEN LAWN GRASS SEED

The best brand for seeding down new lawns and renovating old ones

**C. & J. VELVET GREEN LAWN GRASS SEED** is not excelled by any for producing a smooth, even, velvety-green sward that will withstand drought and hard usage, and always makes a handsome appearance. In seeding down a lawn or grass plot, three things are necessary to insure success: First, to prepare the ground so as to have a fine, smooth seedbed; second, to put on plenty of seed; never less, but rather more than the directions call for; third, to start the lawn-mower as soon as the weeds (which are always in the ground and sure to start first) are tall enough to catch, and keep them mowed off close till the grass has time to start and become well established. The seed should be lightly raked in and finished with a roller. Apply any good commercial fertilizer as a top-dressing when needed. One quart of seed is enough for three hundred square feet (fifteen by twenty feet), or at the rate of five bushels to the acre. Lawns should be kept neatly mowed, which induces a clean, even growth of fresh lively green.

Price by mail, postpaid 25 cts. per quart; two quarts for 45 cts.; in bulk, purchaser paying express charges \$1.25 per peck; \$4.00 per bushel of 20 lbs.

No. Grand Prize Orchid-Flowering Canna Lily

# "LOUISIANA"

Originated and Introduced by the CONARD & JONES CO.,  
West Grove, Pa., 1905

**T**HE World's Fair Judges at St. Louis last summer gave it as their opinion that "Louisiana is the finest Orchid-Flowering Canna in existence." They are right. A three years' test on our trial grounds here proves the same thing. It marks a decided advance over last year's very best.

**LOUISIANA** is a vigorous grower, producing a thick mass of glossy green foliage; each leaf edged with a narrow purple band. But its crowning glory is in its flowers; they are like beautiful orchids; size, often more than 7 inches across and every inch a vivid scarlet. (Our artist admits, there is no paint made can match it.) Imagine a plant 7 feet high, having four or five main stems and each one covered with flowers like that shown on the back cover page (say 40 on a plant). You cannot conceive of anything more gorgeous. Its intense brilliancy and beauty are indescribable. The only way you can get a good idea of Louisiana is to see the Plant in bloom.

**PRICE**—Strong Potted Plants \$1.00 each, \$5.00 for 6 delivered free.

## Plant a bed of GORGEOSUS **CANNA LILIES** on your LAWN

**F**OR a gorgeous display of the most brilliant colors all Summer long and until late Fall, there is nothing that can equal the Canna; and there is no way in which Cannas can be more effectively and satisfactorily used than when planted together in large rows or beds. As sizes range from 2 to 6 ft., and colors include some 40 different shades, it is important to select for this purpose kinds that look best together. For the convenience of our customers, therefore, we here offer a few carefully chosen collections. For the size and price of beds named, we believe the arrangements we suggest will produce the finest effects in Canna beds it is possible to obtain. Plant any of these combinations and you will be surprised and delighted with the result. Full directions "HOW TO PLANT" will be sent with each order. (For '50 or more other kinds, see pages 48 to 54.)
